Education

Ph. D. in Computational Chemistry, 2001–2006. Dissertation topic: *The development of improved semiempirical methods*; Research Advisor: William L. Jorgensen
Yale University

M. Sc. in Organic Chemistry, 2001–2002
Yale University

B.Sc. in Chemistry, 1995–2001. Undergraduate thesis: *Computer-Assisted Organic Synthesis: Development of an Educational Software Package*; Thesis Advisor: José Manuel Méndez-Stivalet
National Autonomous University of Mexico

Overall GPA: 9.86/10

Exchange student, 1998. Education Abroad Program
University of California at Berkeley

Honors, Fellowships, and Awards

- **Marie Curie Incoming International Fellowship**, The European Commission, 2007–2008
Fellowship for postdoctoral research at the University of Basel under Prof. Markus Meuwly
- **CINF Scholarship for Scientific Excellence**, ACS Division of Chemical Information, sponsored by IO Informatics, 2005
230th ACS National Meeting, Washington, DC
- **CCG Excellence Award**, ACS Division of Computers in Chemistry and the Chemical Computing Group., 2004
227th ACS National Meeting, Anaheim, California
- **Gabino Barrera medal**, National Autonomous University of Mexico, 2001
Given to the top student of each class
- **Telmex Fellowship**, Telefonos de Mexico, 1997-1999
Given by the national phone company by national competition
- **Second place**, 2nd Inter-university Math Contest (Mexico City), 1998
- **Gold medal**, Iberoamerican Chemistry Olympiad (Buenos Aires), 1995
- **Silver medal**, International Chemistry Olympiad (Beijing), 1995
- **Bronze medal**, International Chemistry Olympiad (Oslo), 1994

Research

- QM/MM simulation of enzymatic reactions. Applied Monte Carlo Quantum Mechanical/Molecular Mechanical simulations to reactions catalyzed by Chorismate Mutase, Halohalkane Dehalogenase, and artificially designed proteins.
- Molecular modeling. Studied steric and solvent effects on pKa via Density Functional Theory combined with Monte Carlo statistical mechanical simulations.
- Semiempirical methods. Developed improved semiempirical methods by using statistical bond and group equivalents, by modifying the core repulsion function, and by introducing orthogonalization corrections to the SCF calculation.
- Computer-Assisted Organic Synthesis. Designed and implemented a client-server Computer-Assisted Organic Synthesis system, which includes pattern recognition, a language interpreter, a graphical user interface, and a knowledge base.

Post-doctoral Research Experience

Postdoctoral fellow

Harvard University

2006–2007

Worked with Prof. Alan Aspuru-Guzik on distributed computing applications for clean energy materials and quantum computing algorithms for protein folding.

Postdoctoral fellow

University of Basel

2007–Present

Working with Prof. Markus Meuly on methods for the simulation of transition-metal catalyzed hydrogenation reactions and reactive molecular dynamics applied to proton transfer in ferredoxins.

Teaching Experience

Math and Science Tutor

Yale University

2004–2006

Helped the students of Yale's Calhoun College with problems in Chemistry, Physics, and Calculus.

Teaching Fellow

Yale University
2001–2004

Computational Chemistry (1 semester), Organic Chemistry (2 semesters), and Organic Chemistry Lab (2 semesters). Responsibilities included leading a lab and/or discussion section and grading.

Teaching Assistant

National Autonomous University of Mexico
2000–2001

Physical Chemistry (1 semester) and Heterocyclic Organic Chemistry (1 semester). Responsibilities included lecturing, leading a lab and a discussion section and grading.

Mentor, Mexican Chemistry Olympiad

National Autonomous University of Mexico
1996–2001

Participated in the training of the teams from Mexico City and Oaxaca, as well as a mentor of the national delegation to the Iberoamerican Chemistry Olympiad in Venezuela in 2000. Worked in design and grading of exams, logistics, website design and administration.

Computer Skills

Languages: Perl (expert), C (advanced), Fortran (intermediate), JavaScript (intermediate), VBA (basic), 8086 Assembler (basic), Java (basic).

Web-related technologies: HTML, XML, CSS, mod_perl, Apache.

Version Control: CVS, Subversion, Perforce, VSS.

Operating systems: Linux, Irix, Windows.

Scientific software: Gaussian, MOPAC, BOSS, JMP, Matlab.

Software Development Experience**PerlMol**

2003–Present

Perl Modules for Computational Chemistry and Chemoinformatics. Available in CPAN; with subscribers in over 20 pharmaceutical companies. Languages used: Perl. Lines of Code (LOC, not counting whitespace, comments, or documentation: ca. 6000).

AnnoCPAN

2005–Present

A web application that presents the documentation for every module on CPAN and allows users to add annotations on the margin. Sponsored by a Perl Foundation grant. Languages used: Perl, JavaScript, SQL. LOC: 2000.

dmoz.org

2002–2006

Developed search engines, anti-spam filters, and other tools for internal use. Languages used: Perl, C, JavaScript, SQL. LOC: 2000.

OSET

2000–2001

Organic Synthesis Exploration Tool. An educational program for retrosynthetic analysis. Languages used: C, Java, JavaScript. LOC: 10,000.

Affiliations**American Chemical Society**

2001–Present

Swiss Chemical Society

2007–Present

Yale Mexican Student Organization

Vice President

2004–2006

Languages

English (fluent), Spanish (native), French (basic), German (basic).
